Green Space Survey 2018

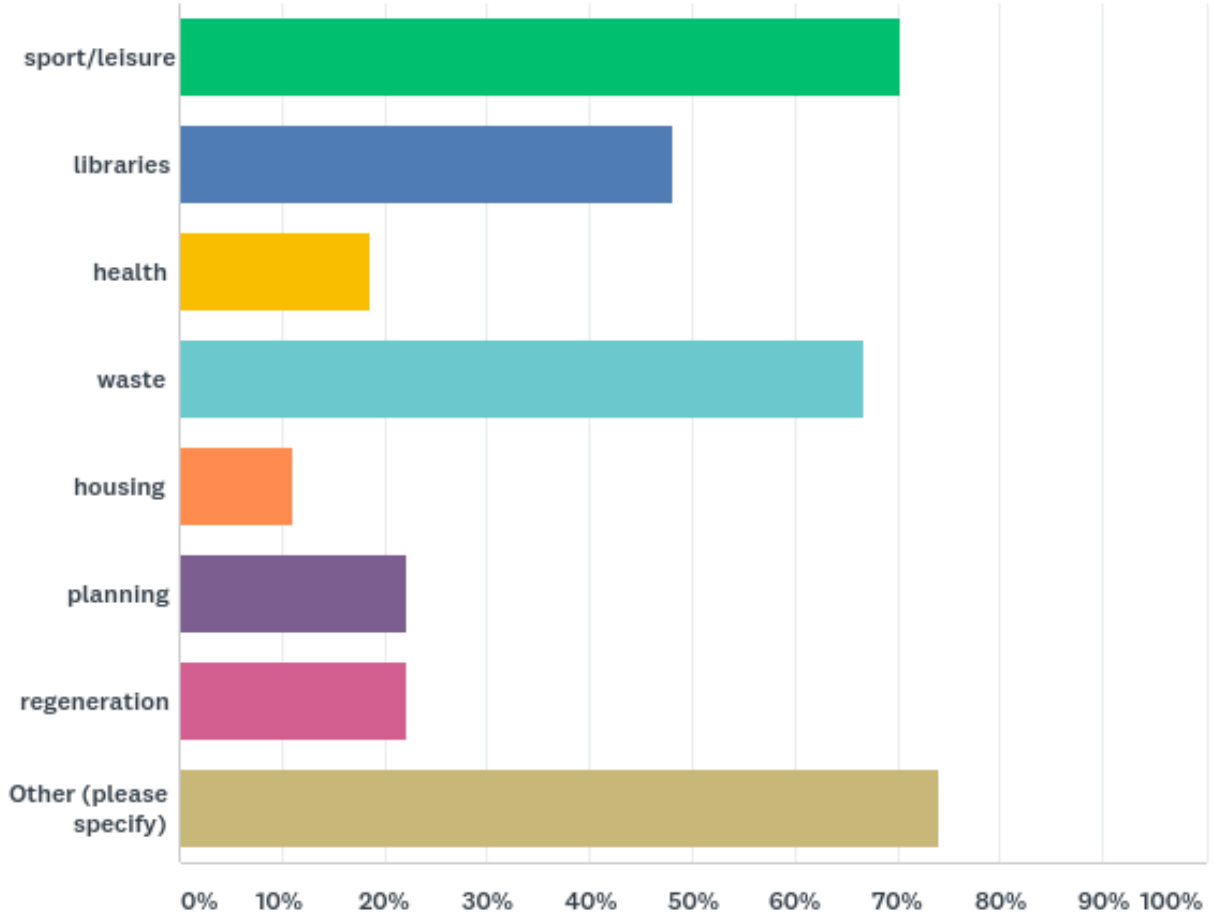

Q7 How are your green space services delivered?

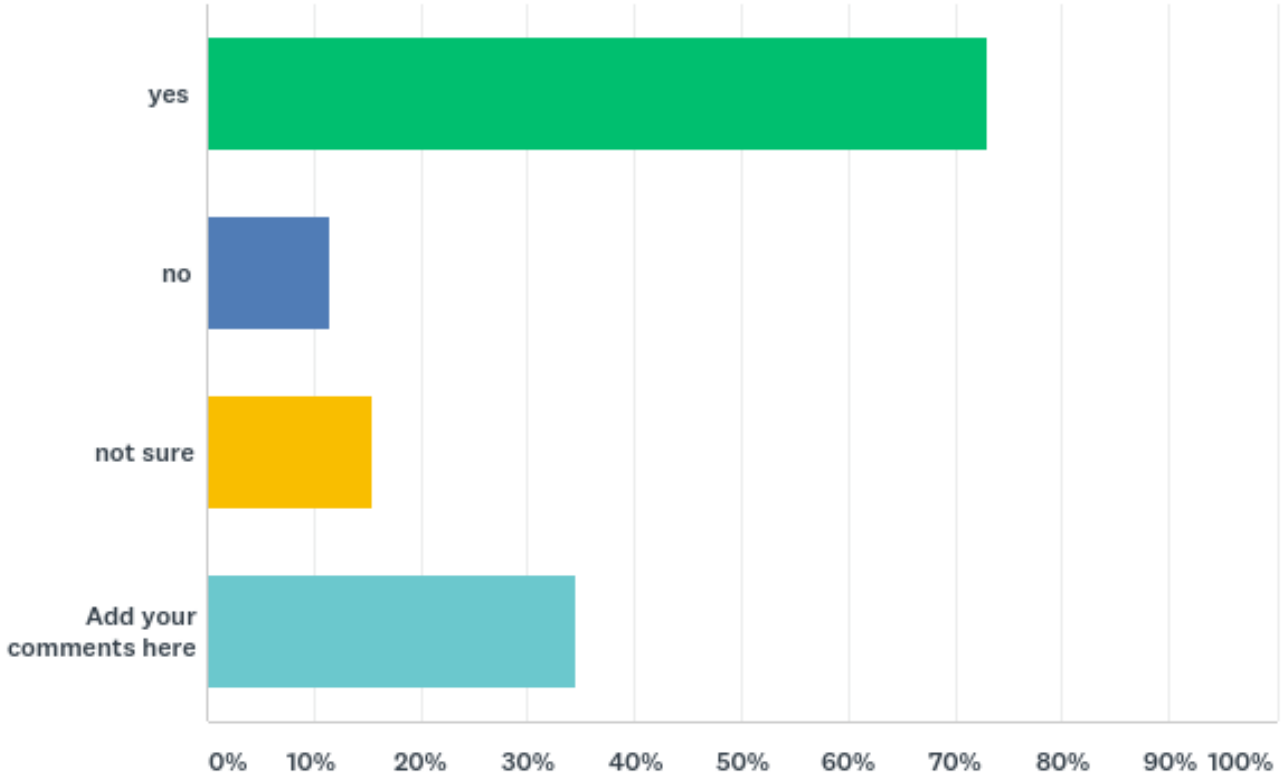

Q 14 Services provided or managed in your Borough

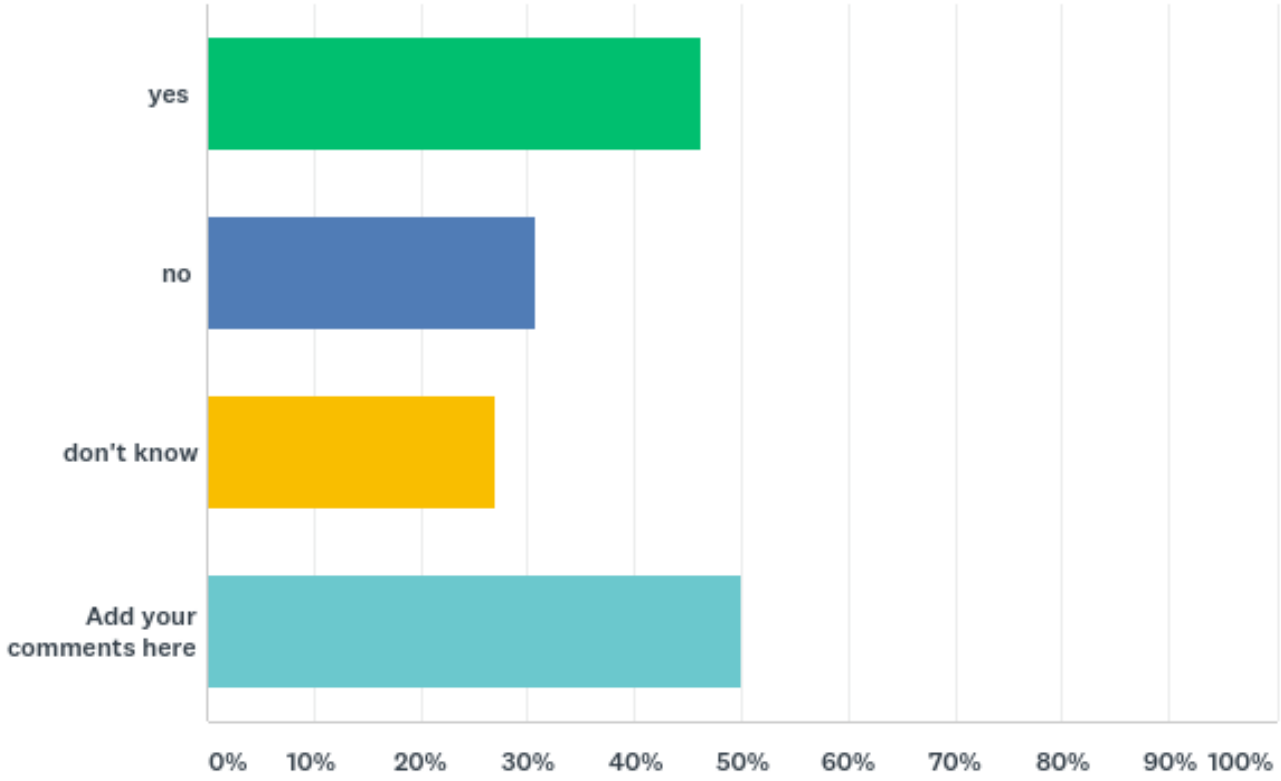

Q4 What other functions are provided in your Department?

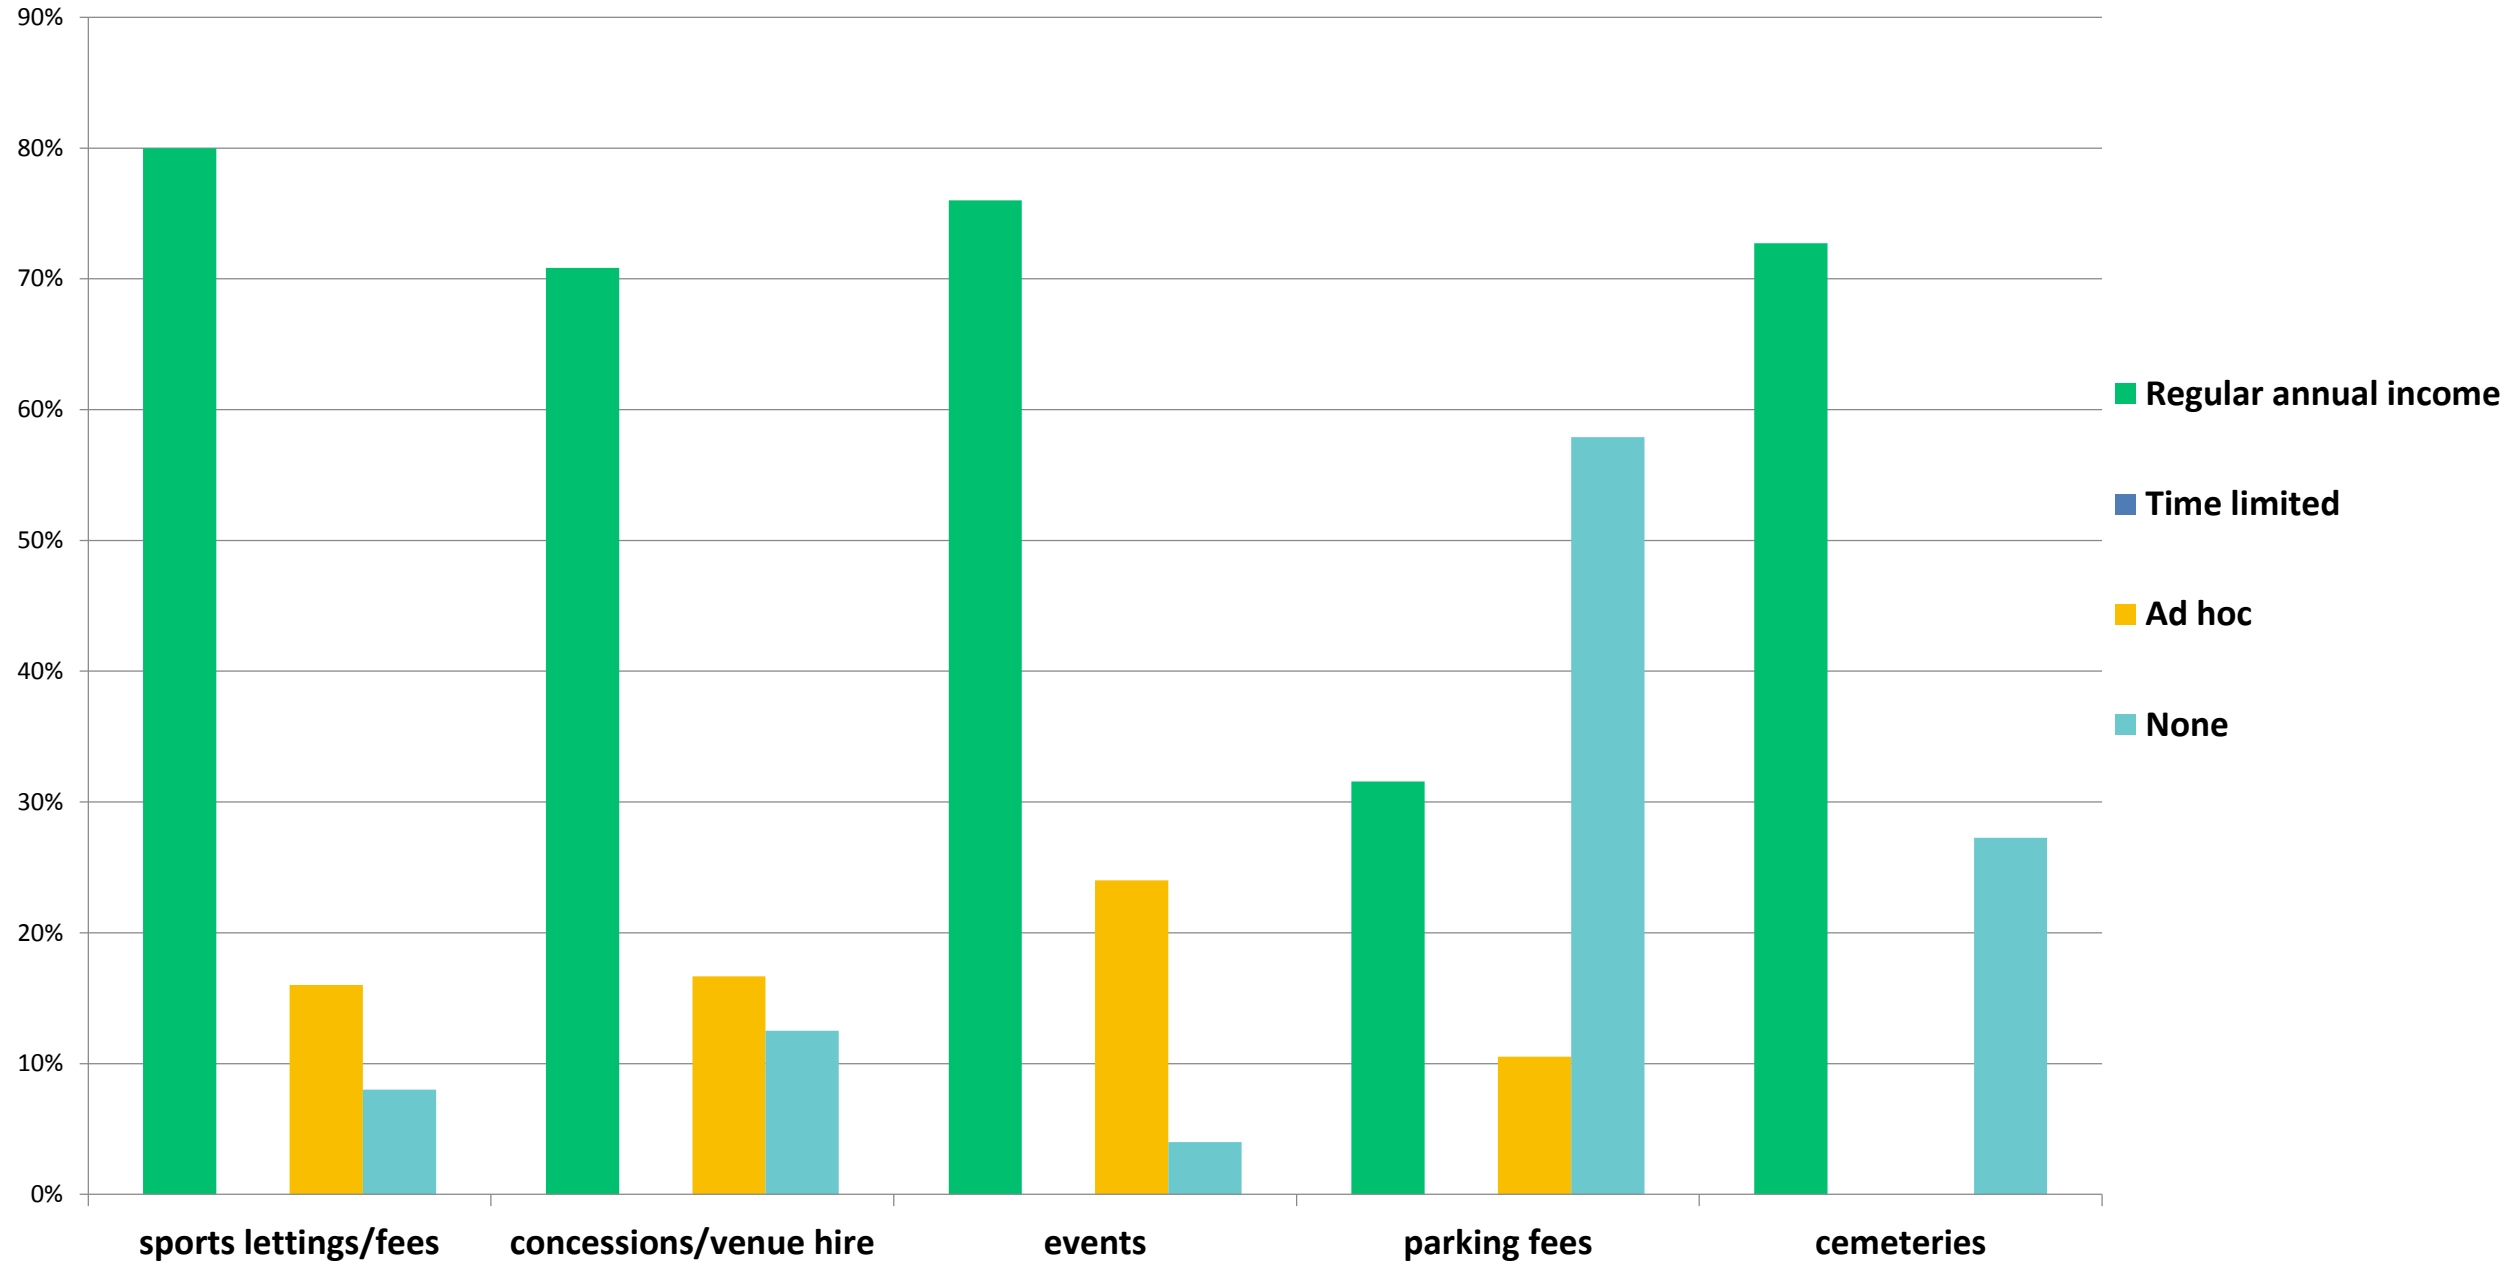

Q8 Are the current arrangements making the best use of resources?

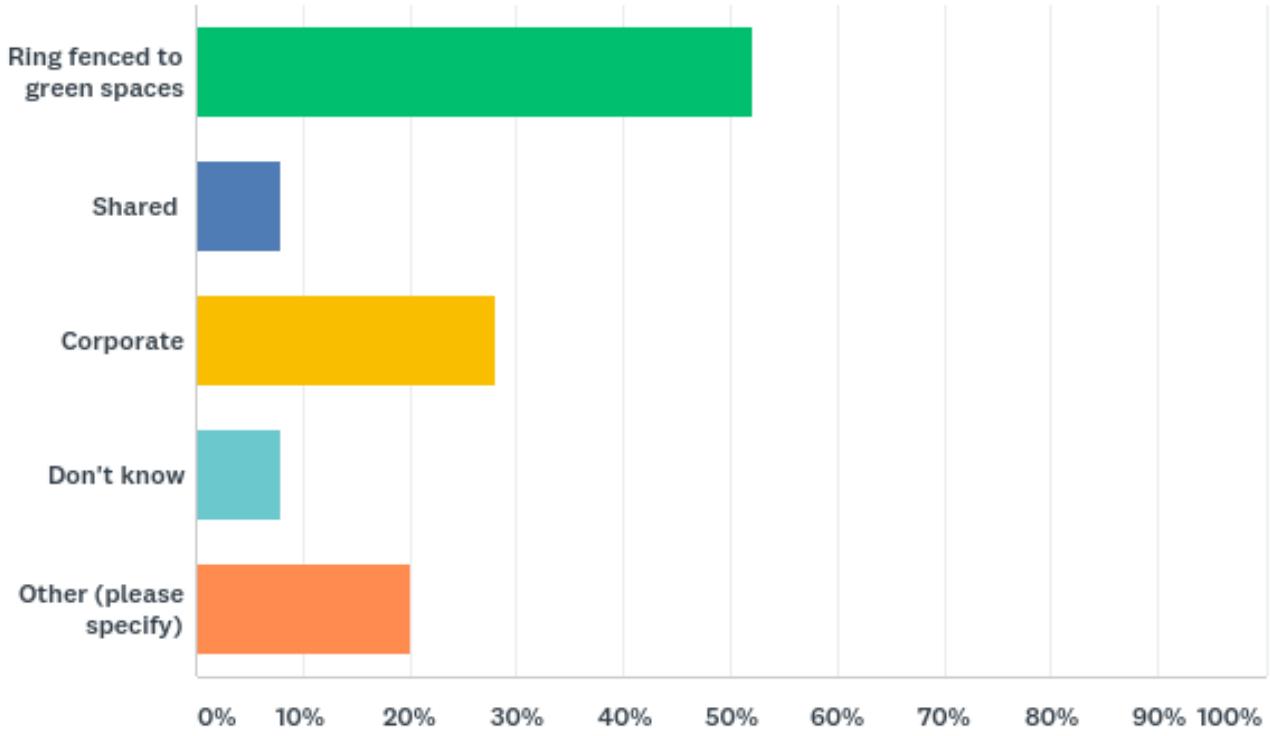

Q9 Do you think the current arrangements are sustainable in the long term?

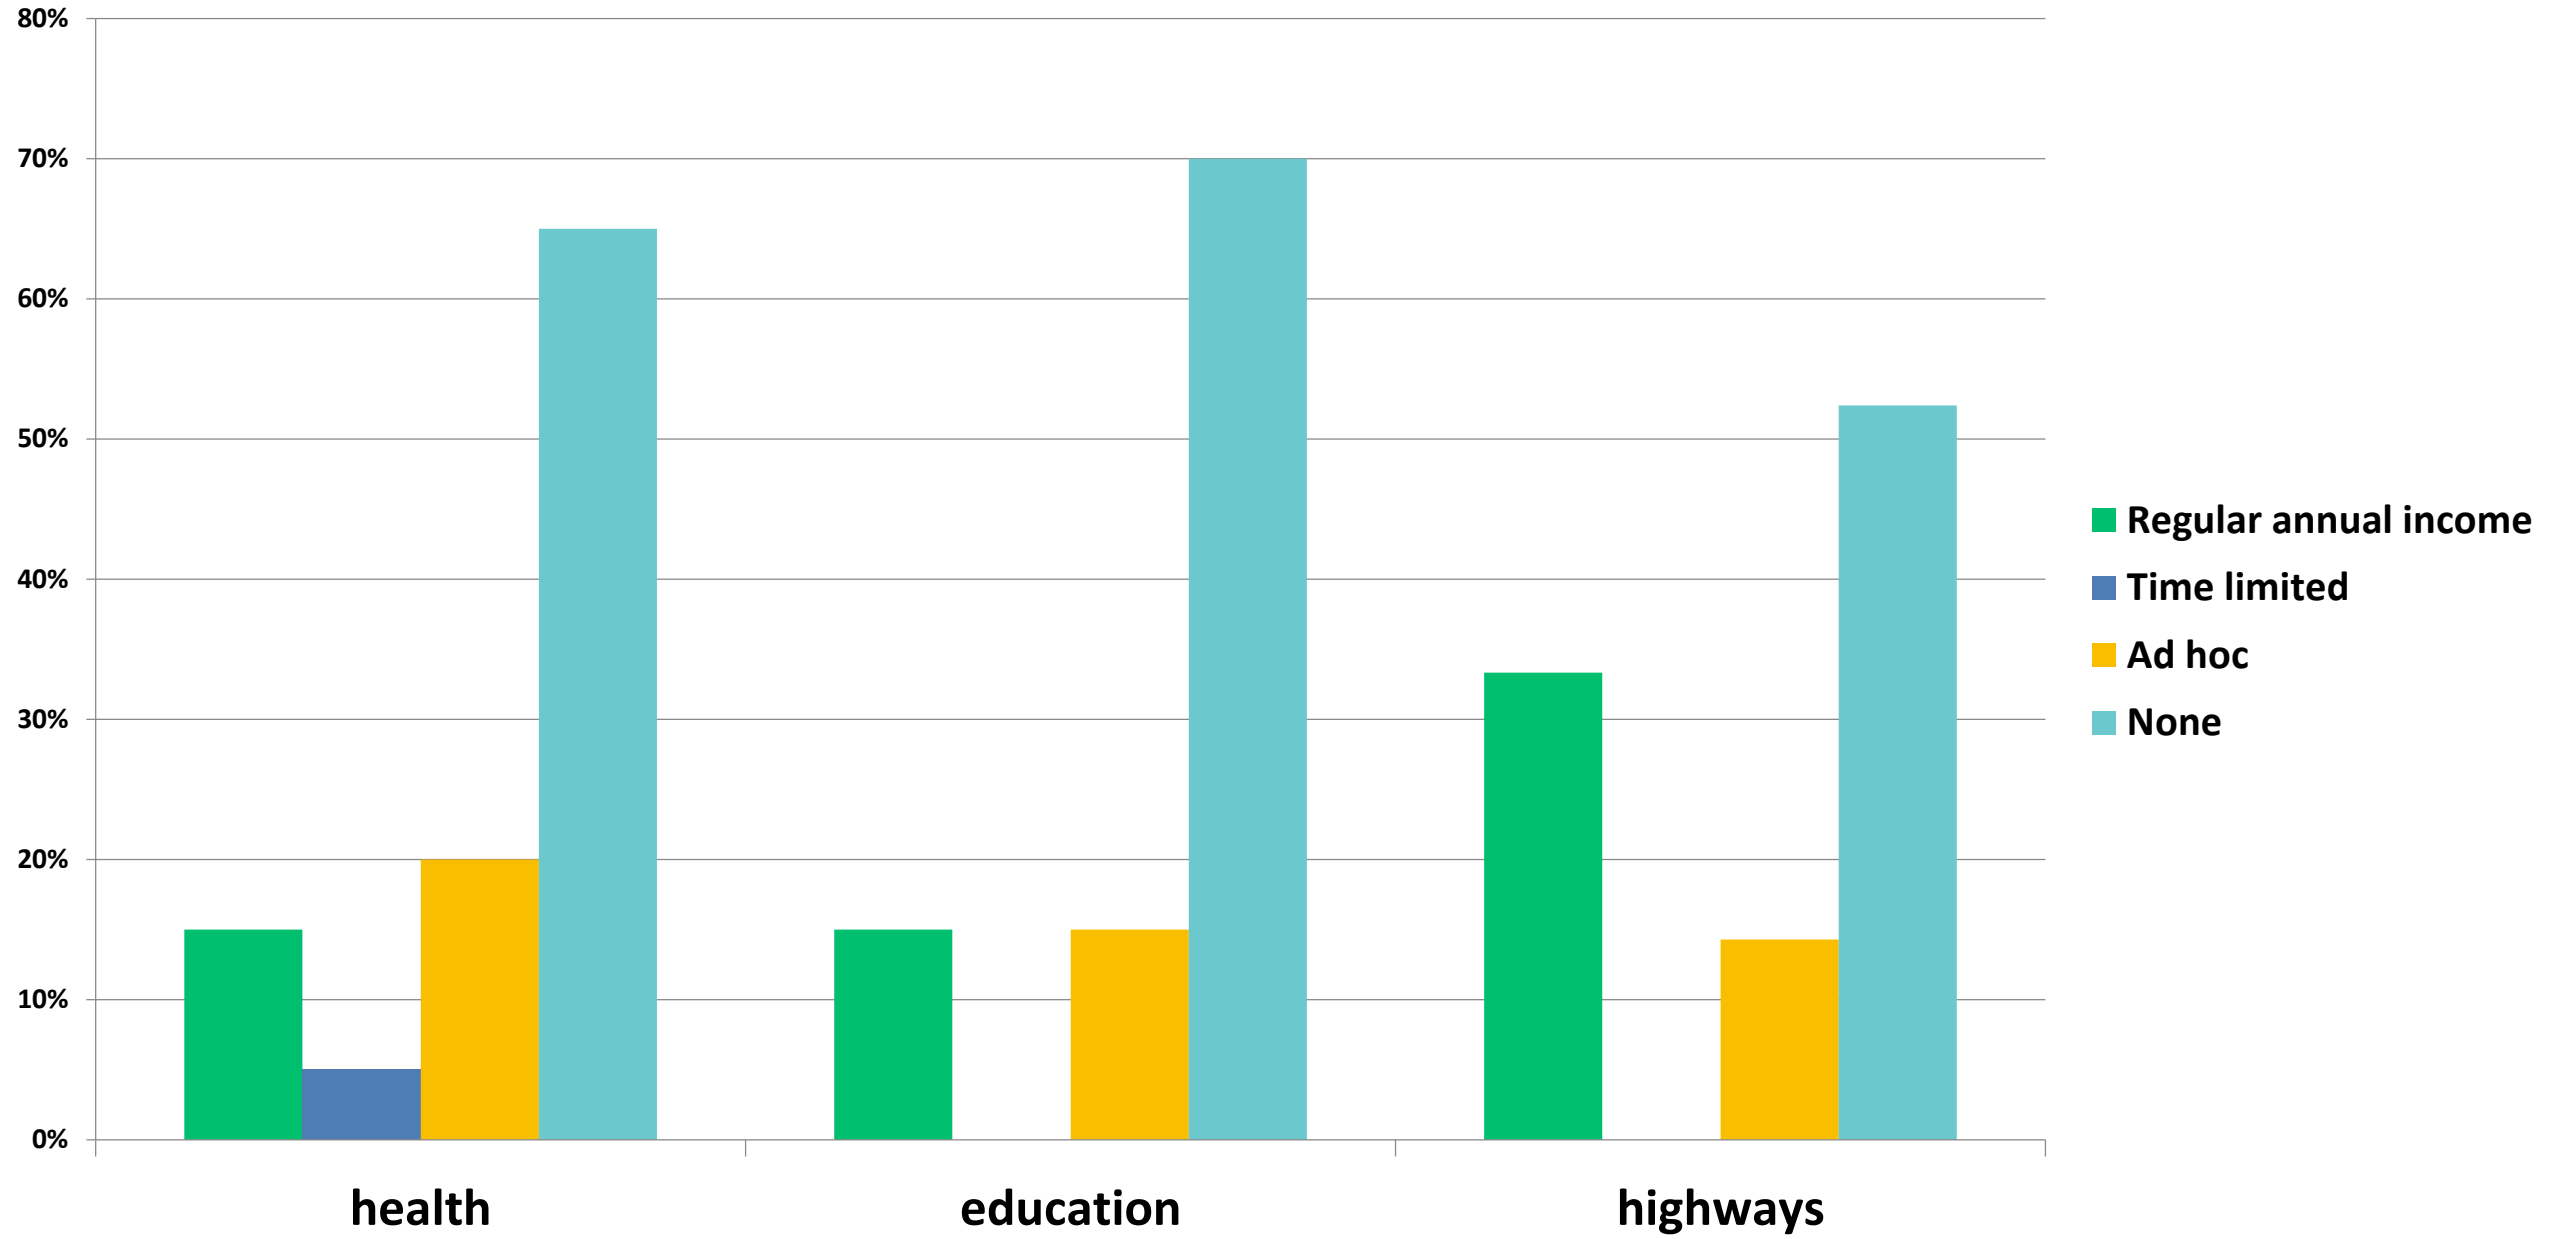

Q23 Which of the following income is generated through your green space assets?

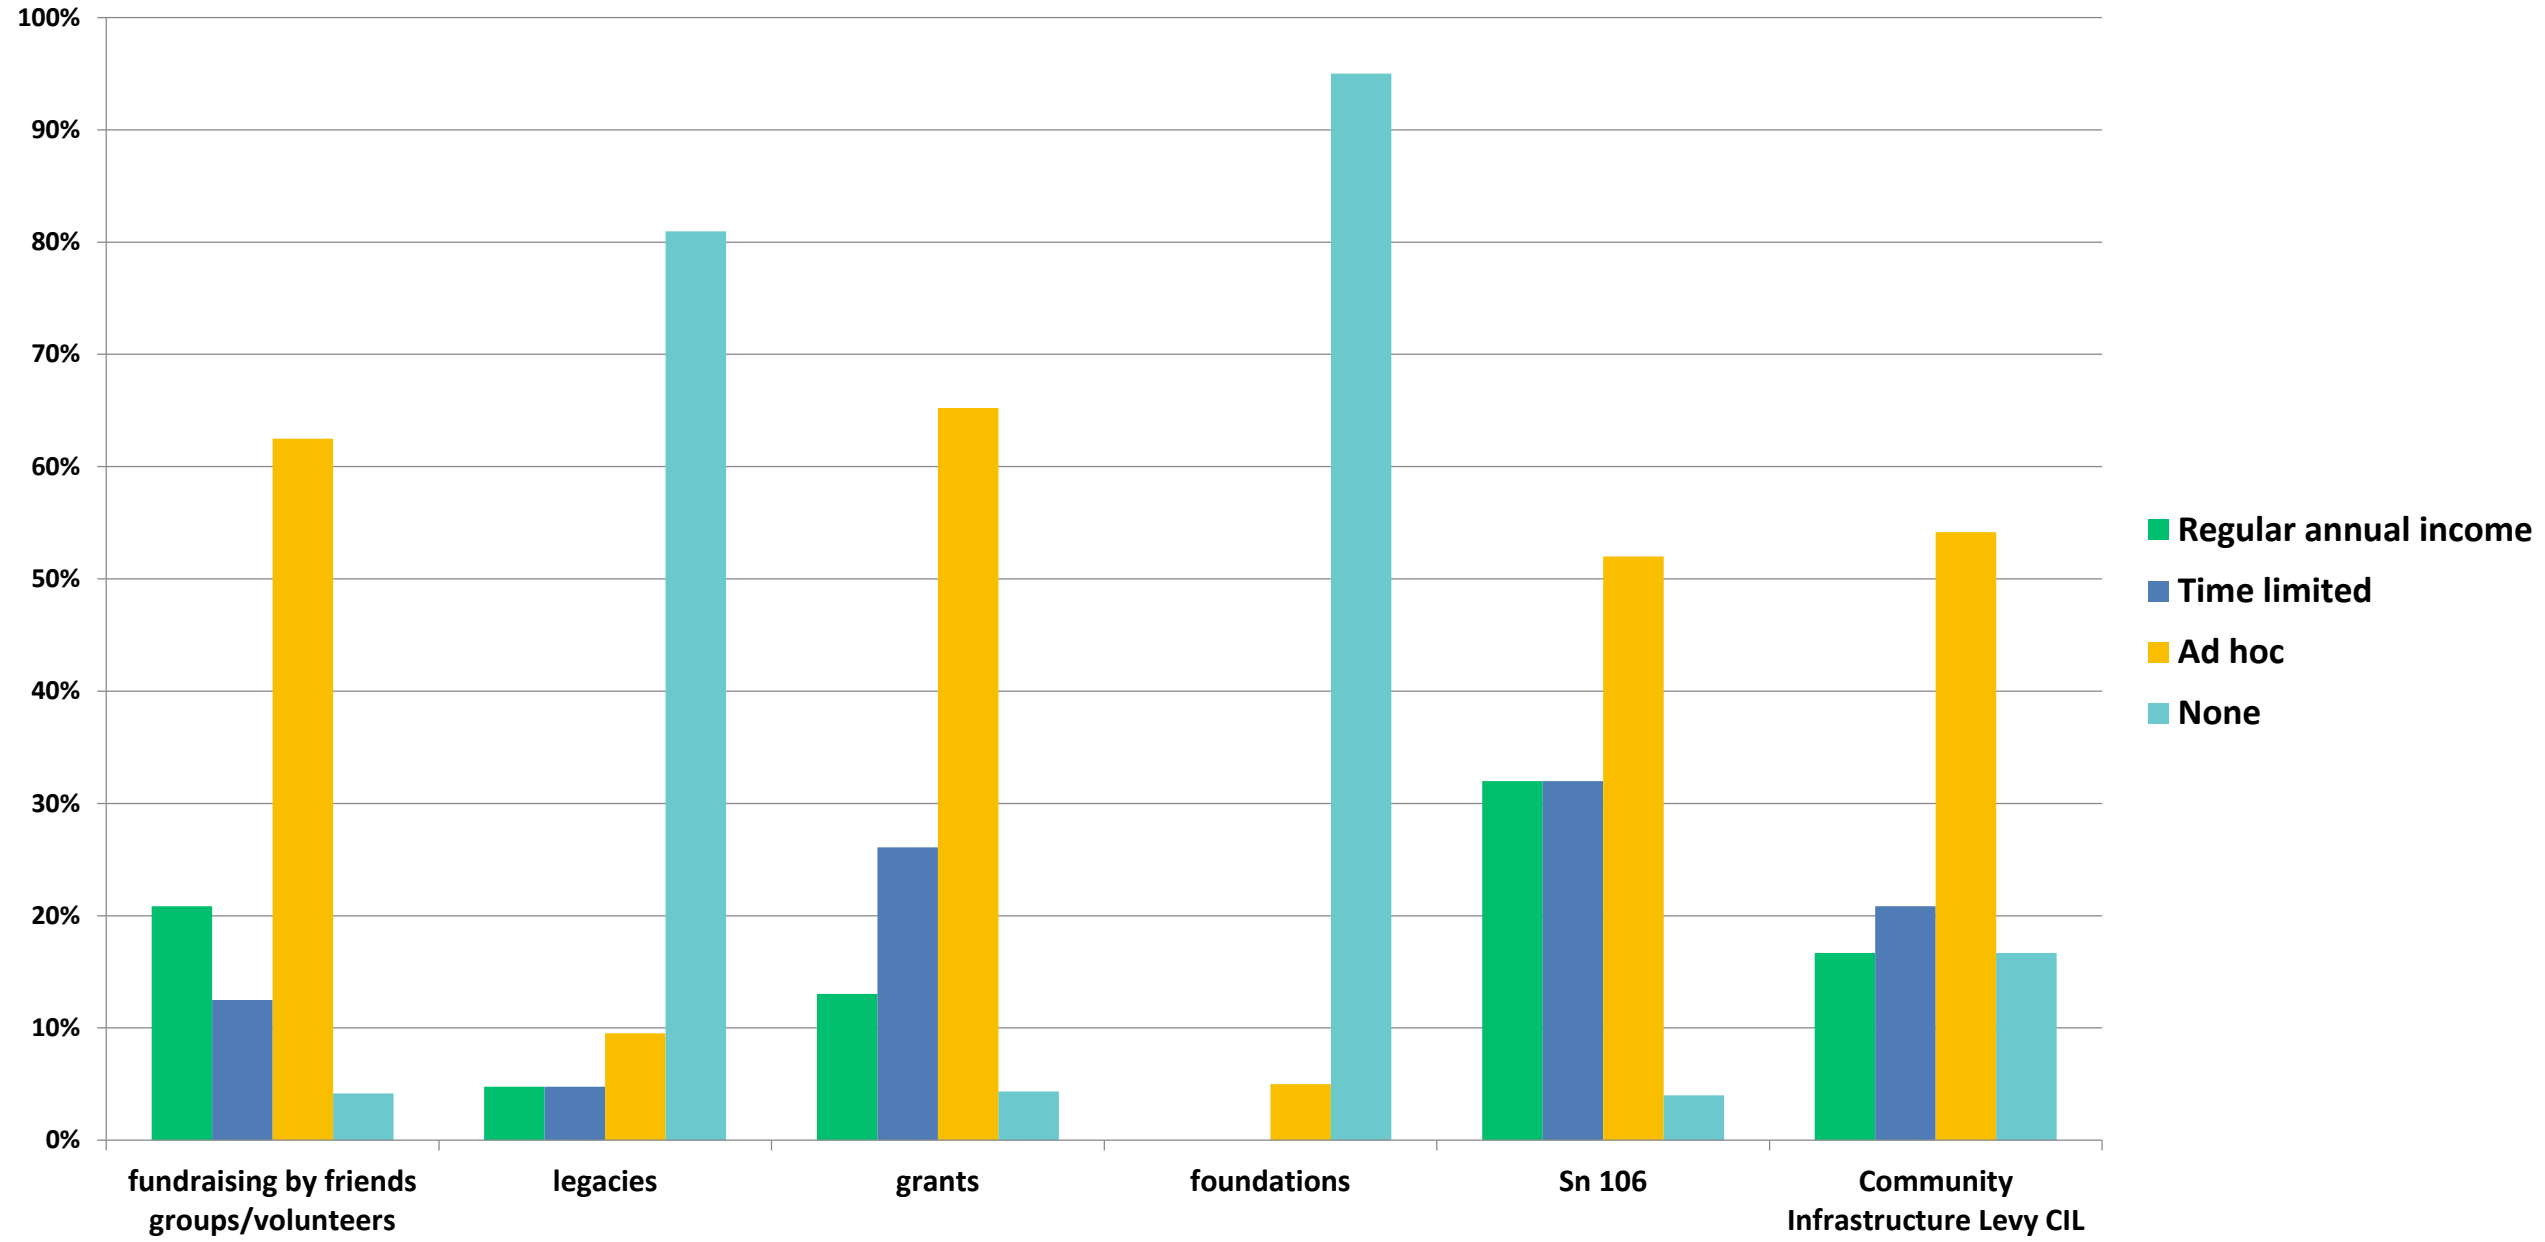

Q27 Where does income from events end up?

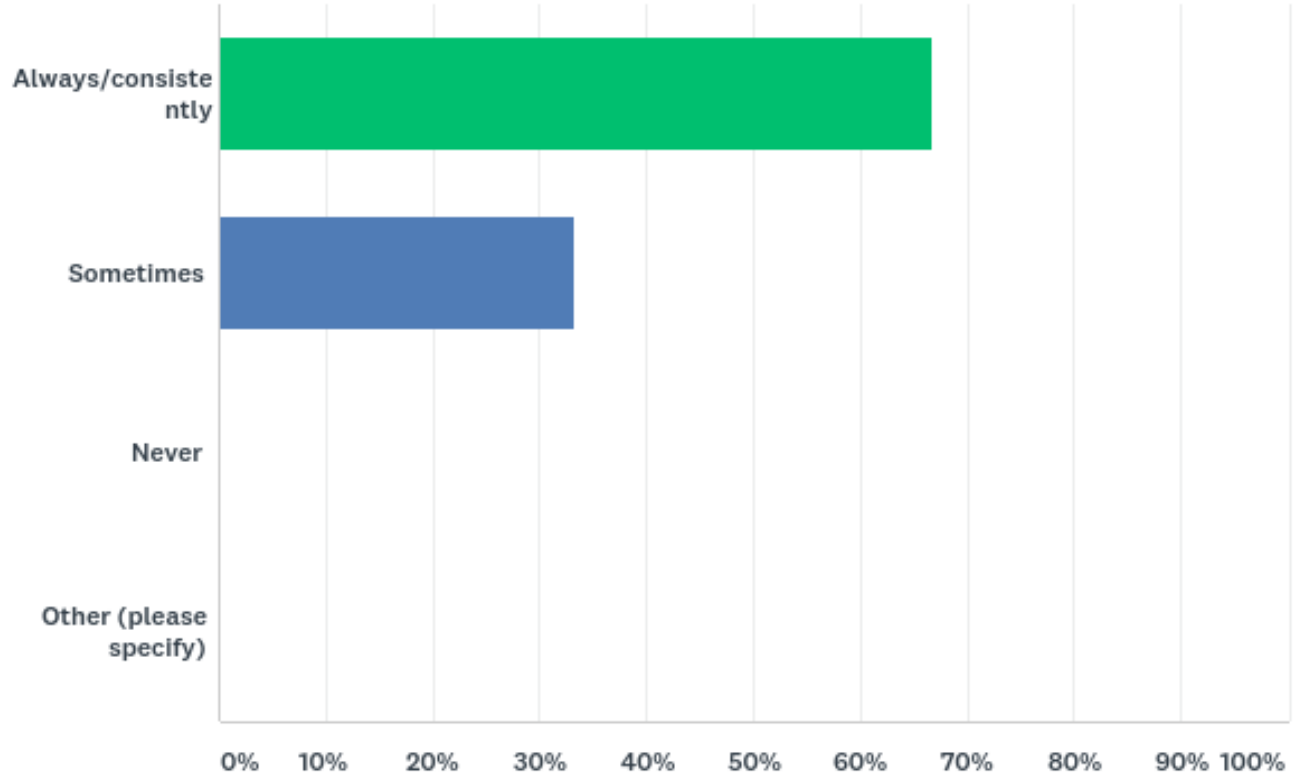

Q24 Which of the following income is paid into your service from other parts of the Council?

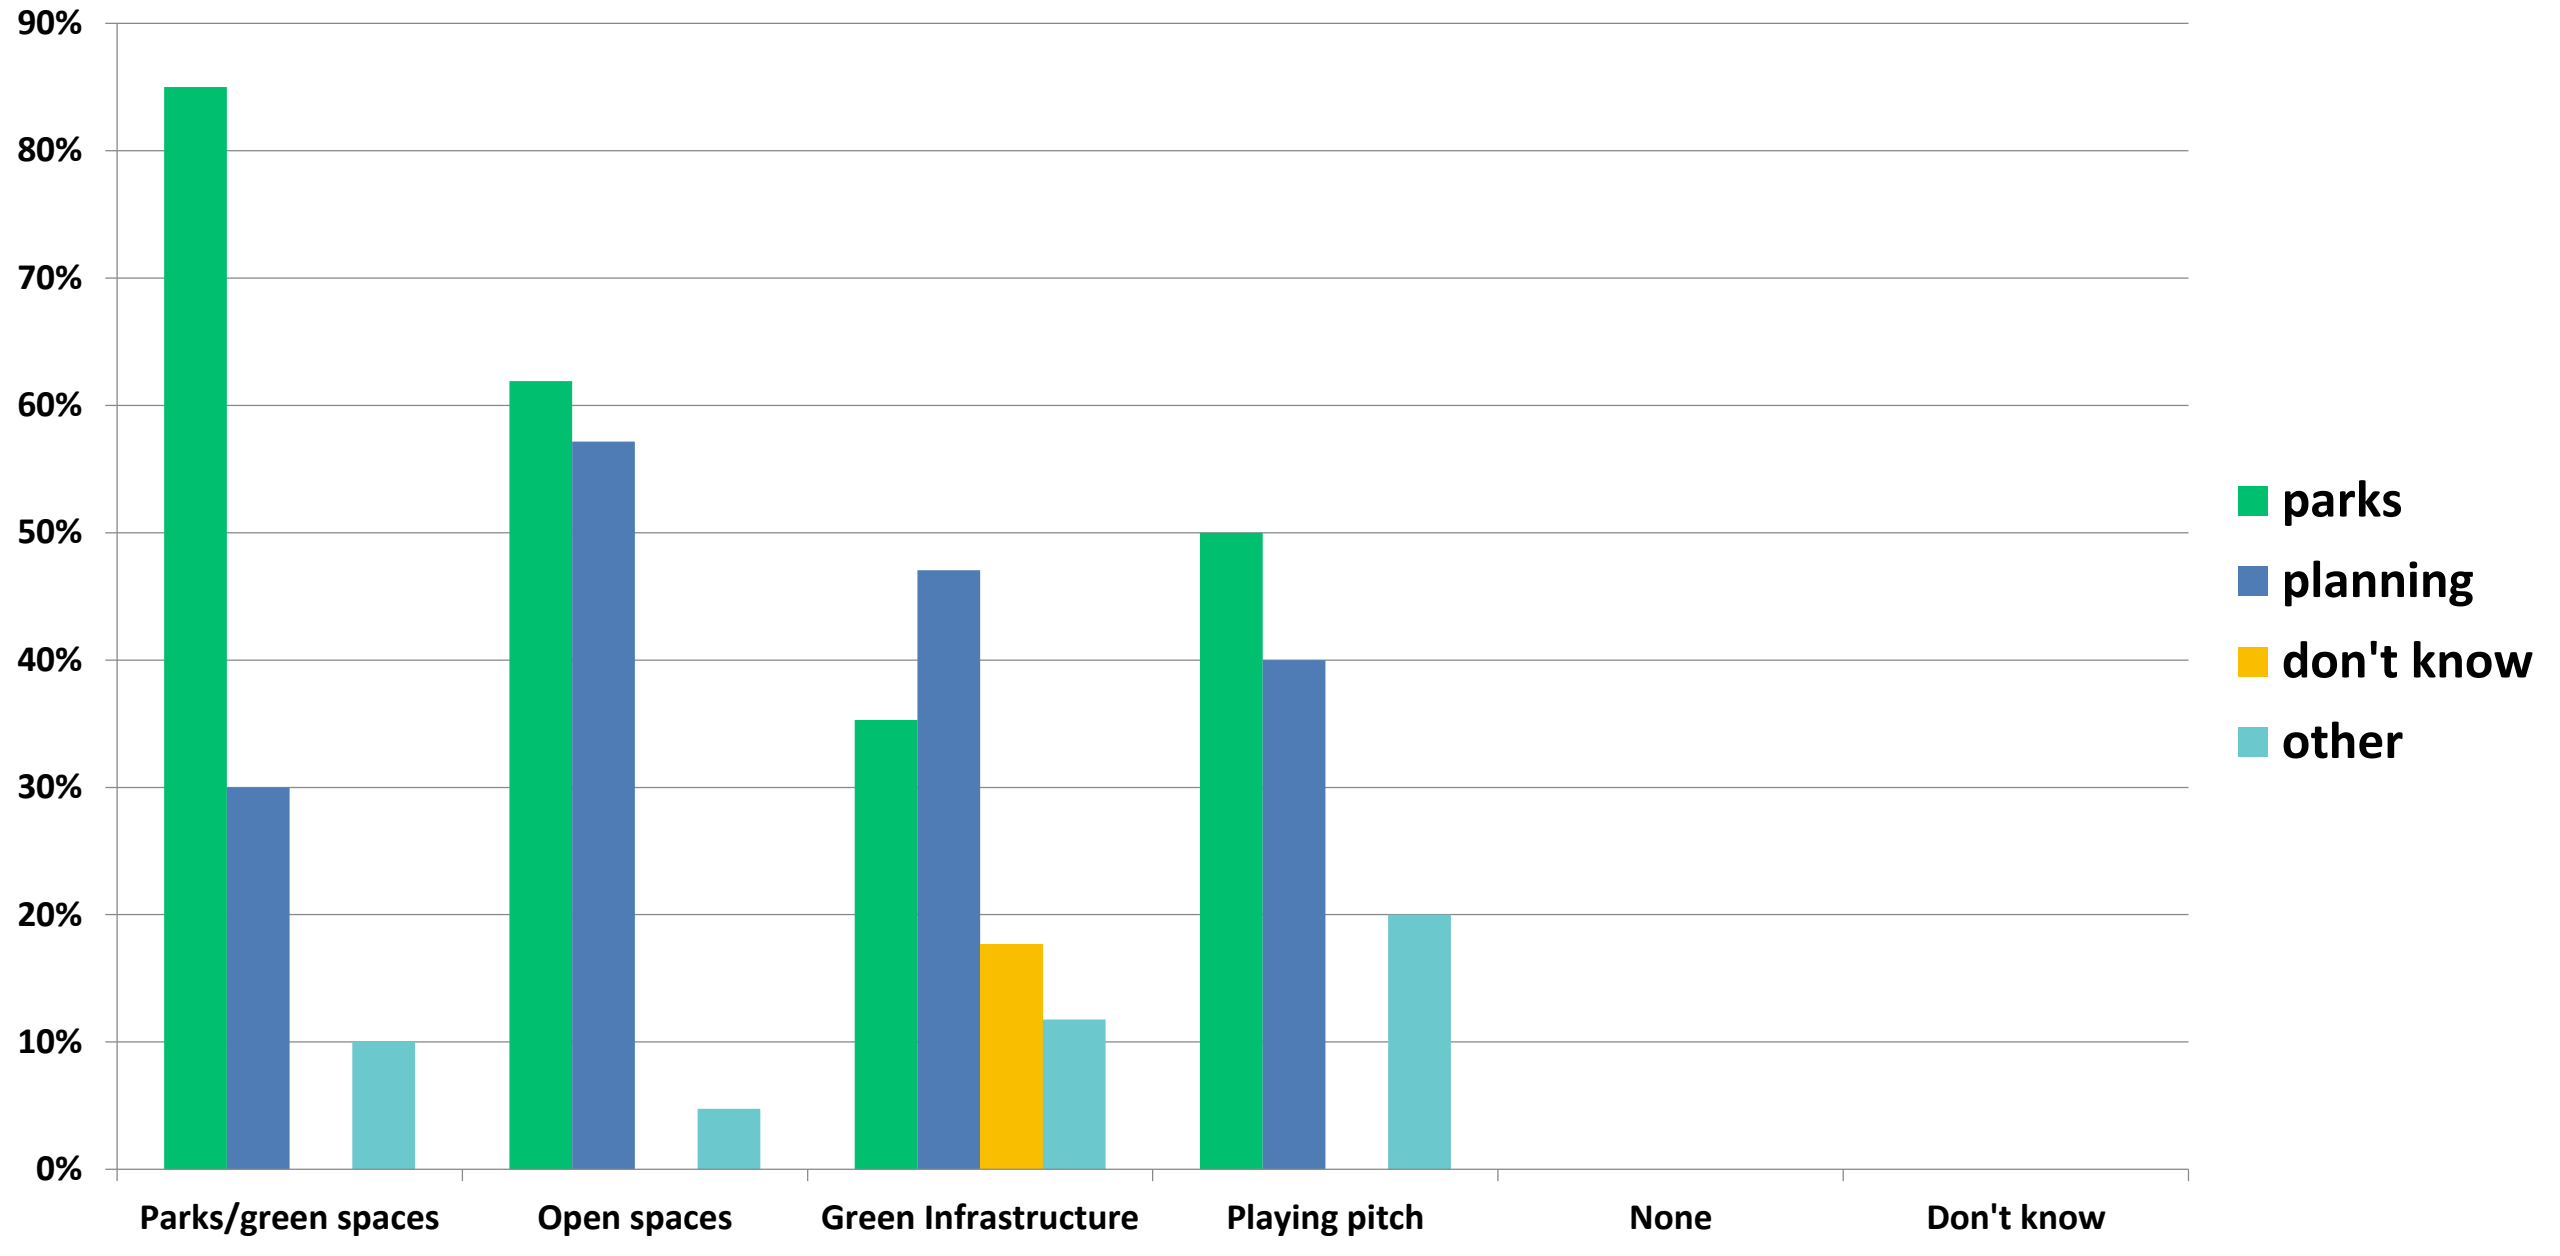

Q25 Which of the following EXTERNAL sources of income support your service?

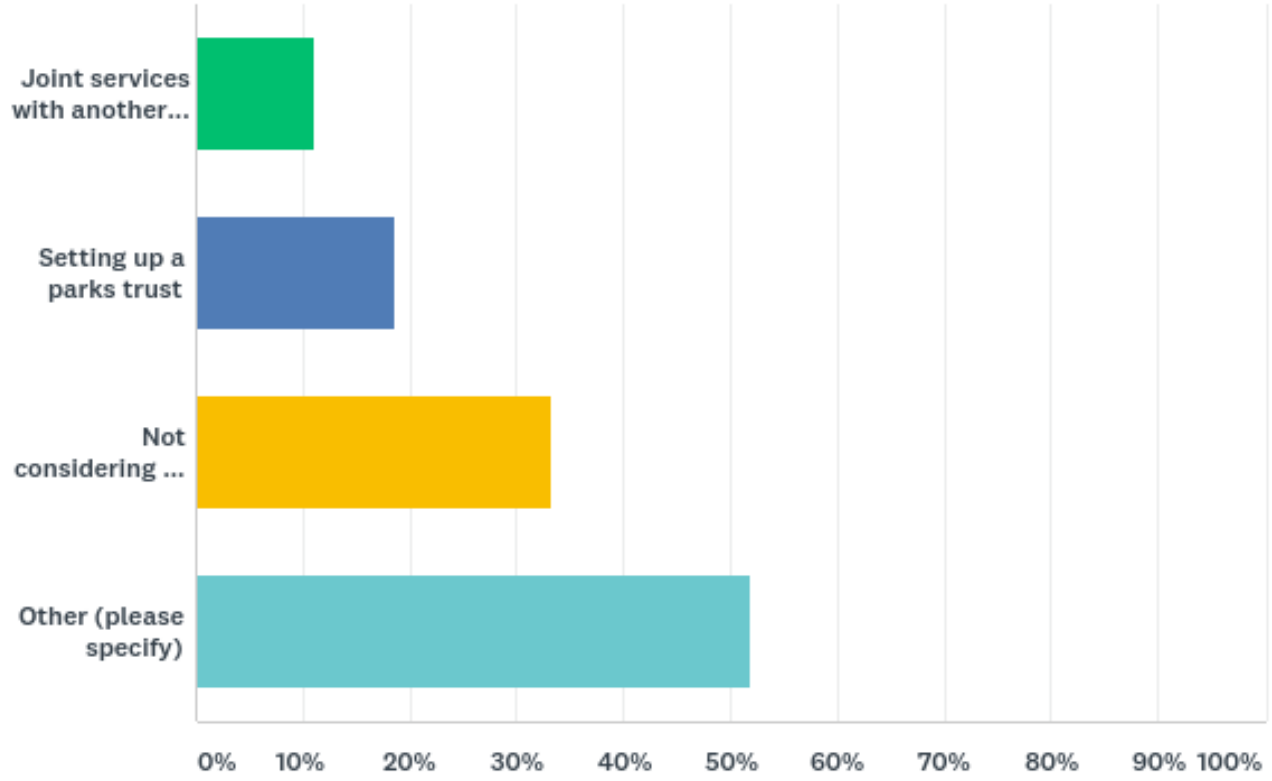

Q32 Do you get involved in planning applications that affect your green spaces?

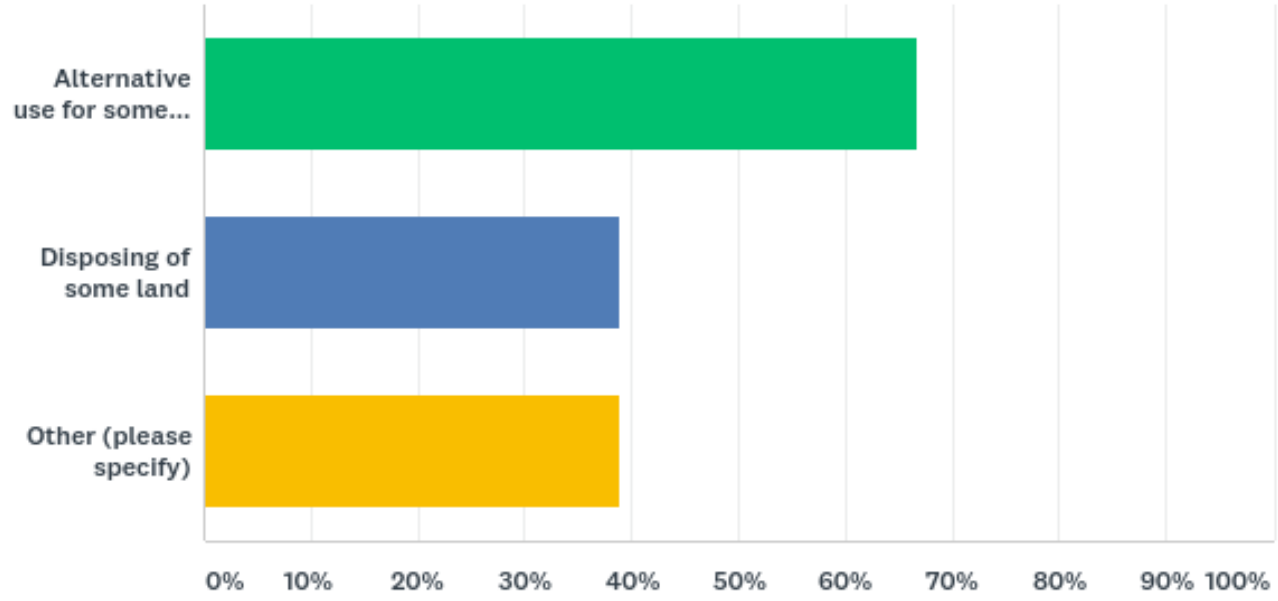

Q35 WHAT kind of strategies do you have and WHO is responsible for them?

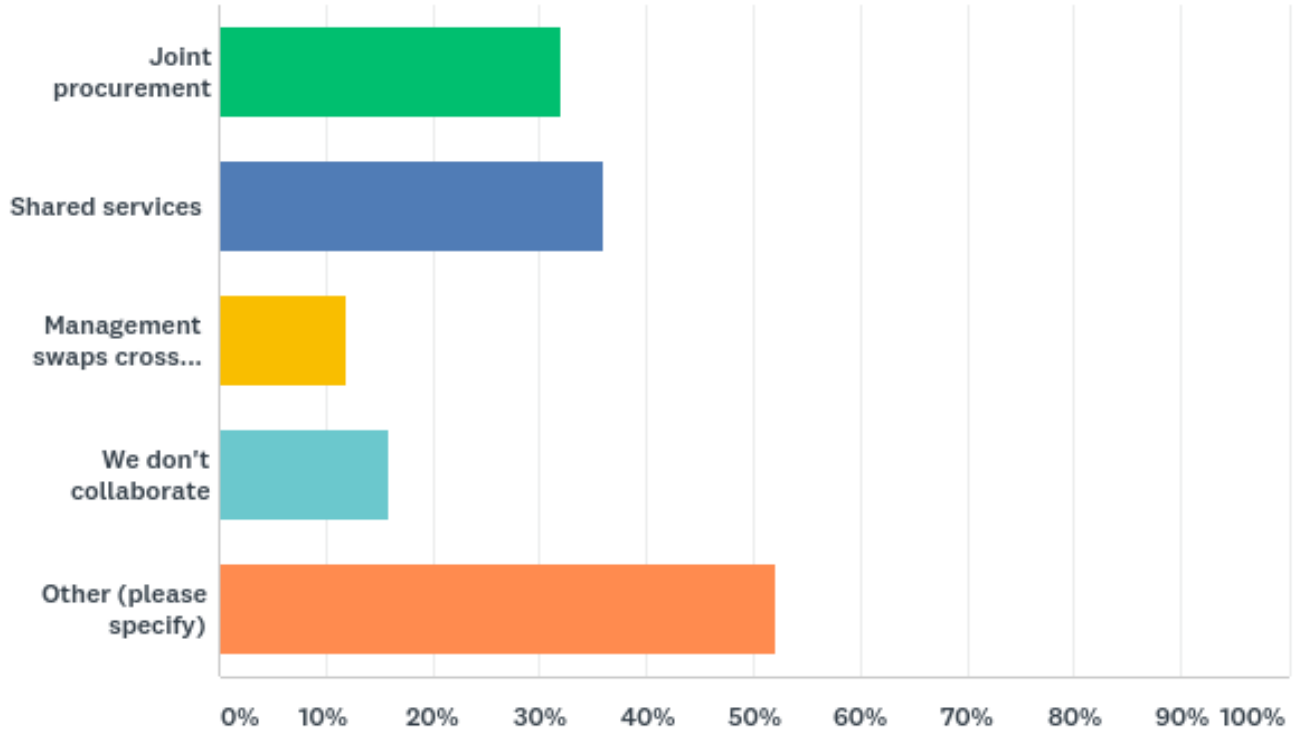

Q6 What changes to your green space services is your Borough considering for the future?

Q31 Is your Borough considering the following options to raise income?

Q15 How do you collaborate regularly with other Boroughs/other organisations?

Current organisation and funding

1. Do physical parks and green spaces intentionally provide services for other strategies (health, education, planning)? If so, provide examples.

2. Do these other strategies contribute to parks' budgets? Should they?

Management /Service delivery

Which current arrangements are sustainable in the long term?

Future/Innovation

1. Have you identified models/best practices for:
    1. income generation/commercial activities;
    2. realigning roles across directorates; or
    3. setting up a parks trust?
       If so, what are these?
2. Do you have a timescale for implementation?
3. Are there opportunities to rethink how funding from development (CIL & S106) is directed to parks and green spaces, particularly ongoing maintenance (instead of capital) expenditure?

Decision making

1. **Who sets the priorities for parks (e.g. sports/playing fields, biodiversity)?**
   Do you agree with these priorities?
2. **What strategies, policies, etc., guide decision makers or do they take notice of?**
3. **Are high-level decision-makers (chief exec/councillor level) receptive to your input? Do they act on it?**

Wrap up question: What do you think would be the most valuable thing that the Green Spaces Commission might do or achieve?
